NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The community map repository should be consulted for possible updated or additional flood hazard information.

be consulted for possible updated or additional food hazard information. To obtain more detidied information in areas where Base Flood Elevations (BFEs) and/or floodways have been determined, users are encouraged to consult the Flood Profiles and Floodway Data and/or Summary of Sillwate Elevations tables contained within the Flood Insurance Study (FIS) report the FIRM represent rounded whole obterievations. These BFEs are insurance for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be utilized in conjunction with the FIRM for purposes of construction and office floodified in the flood of the sole source of floodified interpress of construction and office floodified interpress of

Cosstal Base Flood Elevations shown on this map apply only landward of 0.0" North American Vertical Datum of 1989 (NAVOSB). Users of this FIRM should be aware that cosstal flood elevations are also provided in the Summary of Sillwater Elevations table in the Flood Insurance Study report for this jurisdiction. Levations shown in the Summary of Studiest elevations shade elevation shown the orbit of construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the floodways were computed at cross sections and the floodways were based for the floodways were based for hydraulic considerations with regard to requirements of the National Flood insurance Program. Floodway widths and other perfund floodway data are provided in the Flood insurance Study report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

tras princulous used in the proporation of this map was Onio State. The projection used in the proporation of the production of FRMs for adaption jurisdictions may result in slept positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FRMs of the proporation of the p

LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

in chance flood (100 year flood), also known as the base flood, lei chance of being equilled or exceeded in any given year. rea is the area subject to flooding by the 1% annual chance fi Hazard may include Zones A, AE, AH, AD, AR, AR, 99, Y, and VE is the water-surface elevation of the 1% annual chi

ZONE A No Base Flood Flevations determined

ZONE AH Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined.

ZONE AO Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of alluvial fam flooding, velocities

Area of special flood hazard formerly protected from the 1% annual chance flood event by a flood control system that was subsequently decertified. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood.

ZONE A99

Coastal flood zone with velocity hazard (wave-action); no Base Flood Elevations determined.

ZONE VE Coastal flood zone with velocity hazard (wave action); Base Flood Elevation

FLOODWAY AREAS IN ZONE AE

the channel of a stream plus any adjacent floodplain areas that must be encroachment so that the 1% annual chance flood can be carried without asses in flood heights.

**** OTHER FLOOD AREAS

OTHER AREAS

ZONE X Areas determined to be outside of the 0.2% annual chance floodplain. ZONE D

COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS

OTHERWISE PROTECTED AREAS (OPAs)

CBRS areas and CPAs are normally located within or adjacent to Special Flood Hazard Areas

1% annual chance floodplain boundary 0.2% annual chance floodplain boundary

Floodway boundary CBRS and OPA boundary

Boundary dividing Special Flood Hazard Areas of different Base Flood Elevations, flood depths or flood velocities.
