**PRECAUTIONARY
BOIL ADVISORY**

NOTICE

On Thursday, January 12th, 2012, at approximately 9:15 AM, the Fairfield County Utilities Department is issuing a Precautionary Boil Advisory for its customers on Hounsedale Drive NW; between Canterbury Avenue. and Coventry Avenue, in Pickerington, Ohio.

This Precautionary Boil Advisory is due to a waterline depressurization caused by a water main repair on Hounsedale Drive NW, Pickerington, Ohio.

The **Fairfield County Utilities Department** is advising all users of our water that they must vigorously boil any water used for drinking (including water used to make ice), cooking or oral hygiene for a minimum of one minute, until further notice.

The **Fairfield County Utilities Department** has no evidence at this time that water in the distribution system will be contaminated. The possibility does exist, however, that the water system could be contaminated and is issuing this advisory as a precaution.

The **Fairfield County Utilities Department** will be collecting samples for required testing as soon as the repaired waterline has been chlorinated, pressure tested and flushed. The Precautionary Boil Advisory will usually last for approximately 48 hours while the samples are being analyzed and go through quality control procedures.

The **Fairfield County Utilities Department** anticipates having the Precautionary Boil Advisory lifted on the afternoon of Saturday, January 14, 2012.

The **Fairfield County Utilities Department** will issue an additional notice when the Precautionary Boil Advisory is lifted. For further information contact the Fairfield County Utilities Department Operations Center at (614) 322-5200.

Sincerely,

A handwritten signature in cursive script that reads "Rge Donnell".

Chief Water Operator
